

Get Started Using the Nursing Wiki

www.arnbc.ca/wiki

Join

Step 1: Register for a Wikidot account - Wikidot is the service used to create and host the Nursing Wiki

- Click "Create account" in the top right hand corner
- Provide a valid email address that a verification code can be sent to
- Follow the link in the email to enter the code and complete your Wikidot registration

Step 2: Join the Nursing Wiki

- Log into your Wikidot account
- Request to "Join this Site" (link on the left sidebar)
- Site administrators will review your request to join. When you have been approved to join you will be notified via email and a notification in your Wikidot account

Create a New Page

- Under the "pages" heading in the left sidebar, type in a page name (don't worry, you can edit the page name later) and click "new page"
- Create your page, format text, add pictures, create hyperlinks, etc.
- Don't worry if there are a lot of strange symbols around the content you are creating, once it is up on the site it will look normal. Click "preview" at the bottom at any point to see what the page will look like in final form
- Don't forget to save your page when you are finished

Edit a page

- Go to the page you would like to edit and click "edit this page" on the left sidebar
- Make your edits then click "save"
- Wikidot keeps a record of all edits made, they can be found under "history" at the bottom of each page. In addition, watchers of the page are notified of all alternations made
- If you are making a very minor change such as adding a missed apostrophe to a sentence you may want to turn notification to watchers off

Keep Updated on Pages - Watching

- When you create or edit a page, you are automatically watching the page which means that you will receive a notification when someone alters the page
- You can also click "start watching" in the options section to receive notifications about any page you like
